

# How to convince reluctant Engage adopters

Hold on to the textbook if you need to, but consider moving to ATI Review Modules instead.

Point out that traditional textbooks offer too much information — much more than students need to know.

Explain how word of mouth from class to class will result in textbooks fading out over time.

Illustrate the advantages of Engage Fundamentals: simplified content that students can quickly navigate to find what they need.

Leave the textbook on your reference list as a "recommended" resource rather than making it mandatory.
