

3 EASY TIPS FOR USING SKILLS MODULES 3.0 IN THE CLASSROOM

1. ASSIGN SKILLS MODULES 3.0 AS A PRECLASS ACTIVITY

You'll ensure students arrive to labs prepared and can put their knowledge into practice and maximize their lab experience.

2. PAIR UP STUDENTS TO COMPLETE AN ACTIVE LEARNING TEMPLATE

Placing students into pairs for the assignment provides the opportunity for collaboration and discussion within the lab setting.

3. REVIEW CULTURAL CONSIDERATIONS

Create an activity for students to identify key cultural considerations related to specific skills during lab time. Practicing in a safe, nurturing environment helps students develop clinical judgment skills that prepare them for clinical decision making and ensuring positive outcomes for their patients.
