

Replace Lost Clinical Hours

ATI's clinical simulation solutions offer students valuable experience preparing for, supplementing, or even replacing clinical time when the need arises. Featuring realistic scenarios, active learning, quizzing, and practice applying clinical judgment, modules cover many topic areas throughout the curriculum. There are countless ways to use and expand on each solution in large groups, small groups, and independently.

SIMPLIFY CLINICAL SIMULATION LESSON PLANNING.

With growing needs to replace lost clinical time and move to online learning, ATI has developed two comprehensive tools to guide nurse educators as they engage our many great clinical solutions to meet student outcomes.

Whether you need an immersive clinical day simulation that utilizes many ATI solutions, or a quick, standardized clinical hour replacement activity for a single ATI solution, we'll guide you through it.

- + Provide a selection of more than 800 RN / 500 PN hours of clinical replacement activity options
- + Help you use ATI's clinical simulation solutions to replace lost clinical hours based on industry best practices and professional standards
- + Include activity objectives and outcomes so you can select those that best align with your established clinical objectives
- + Are intended to be used with your learning management system.

ONLINE CLINICAL PLANS (OCPs)

These comprehensive sets of faculty lesson plans, student checklists, and educator implementation guides utilize **immersive clinical simulation** to replicate a **full clinical day** — including pre- and post-conference — for **5 RN and 3 PN topic areas**. They strategically adhere to **NCSBN guidelines** and **INACSL's standards** of best practice for simulation as each begins with prebriefing, weaves together a **series of ATI screen-based solutions**, then ends with debriefing and evaluation. OCPs include:

- + An assortment of simulation activities, incorporating numerous ATI clinical simulation solutions throughout each lesson plan
- + ATI screen-based activities and scenarios for three student competency levels
- + Integration of assessments for post-activity evaluation of group and individual outcomes
- + Easy identification for alignment with your program outcomes and clinical objectives for accreditation and regulatory purposes.

VIRTUAL CLINICAL REPLACEMENT LESSON PLANS (VCRs)

These 34 ready-to-use lesson plans cover **12 topic areas** and offer a variety of online-based activities to complement ATI solutions. Each supports a **single ATI screen-based solution** and is packed with **independent and online group activities**. VCR lesson plan activities can be added, skipped, or interchanged as they're designed to offer novice or seasoned educators a **customizable plan** for replacing a desired number of clinical hours quickly and easily. VCRs include:

- + Product scenario overviews
- + Descriptive instructions for a variety of activities, such as: individual and group reflection activities, online group work, and discussion boards
- + Pre- and post-activity questions.

Adult med-surg	Adult Med-Surg I RN: 5 Modules, 41 hours PN: 5 Modules, 36 hours Adult Med-Surg II RN: 5 Modules, 43 hours PN: 5 Modules, 39 hours	Real Life, 80 RN / 80 PN hours Video Case Studies, 72 RN / 66 PN hours
Civility		Civility Mentor, 40 RN & PN hours
Communication		Nurse's Touch, The Communicator 2.0, 81 RN & PN hours
Community health		Video Case Studies, 12 RN hours
Fundamentals	RN: 5 Modules, 34 hours PN: 5 Modules, 34 hours	Video Case Studies, 43 RN / 41 PN hours
Health assessment		HealthAssess, 46 RN hours
Leadership / management		Nurse's Touch, The Leader, 39 RN hours Video Case Studies, 24 RN / 20 PN hours
Maternal newborn	RN: 6 Modules, 38 hours	Real Life, 80 RN hours Video Case Studies, 23 RN / 23 PN hours
Mental health		Real Life, 64 RN hours Video Case Studies, 33 RN / 33 PN hours
Nursing care of children	RN: 6 Modules, 39 hours	Real Life, 80 RN hours Video Case Studies, 33 RN / 33 PN hours
Nutrition		Video Case Studies, 10 RN hours
Pharmacology		Video Case Studies, 32 RN / 32 PN hours

CLINICAL SIMULATION SOLUTIONS

- + Real Life Clinical Reasoning Scenarios
- + HealthAssess
- + Video Case Studies
- + Nurse's Touch Suite
- + Civility Mentor
- + Skills Modules
- + EHR Tutor

**VCRs and OCPs have been developed to facilitate integration of simulation-based learning experiences into the curriculum for nursing programs who are responding to a lack of clinical facility access, insufficient clinical learning opportunities, or flexibility in achieving clinical outcomes. Educators should consider accreditation requirements, regulatory guidelines, and program-specific student learning outcomes, competencies, and evaluation measures when choosing simulation-based learning experiences for clinical supplement or replacement. Stated hours are approximate and based on completing all lesson plan activities as directed.*
